Module: File Manager

Overview

The **File Manager** module in the NASENI ERP system serves as a centralized digital repository for managing and accessing files across various departments and directorates within the organization. This feature ensures efficient document organization, accessibility, and control through a structured folder hierarchy and categorized file types.

Functional Description

1. Department and Directorate Structure

- The File Manager displays multiple **Departments and Directorates**, each represented as separate folders.
- Every department or directorate folder contains files and subfolders related specifically to that functional area.
- This hierarchical folder structure enables users to easily navigate and manage documents based on organizational divisions.

Example:

- Department: Human Resources
 - Directorate: Recruitment
 - Files: Appointment Letters, Contract Files, Memos, etc.

Permission - View File Manager

2. File Types

The system supports multiple file types to accommodate different categories of official documentation. Each file type has its own structure and purpose within the ERP system. The available file types include:

1. **General File**
2. **Contract File**
3. **Memo**
4. **Mail**
5. **other**

Permission - Create New File

3. File Creation and Management

- Users can create **new files** under a specific department or directorate folder.
- Each file includes essential metadata such as:
 - Document Type
 - Upload File
 - Title
 - File Number
 - File Category
 - File Status
 - Keywords
 - Classification
 - Add Tags
- Files can be **viewed, edited, or downloaded** based on user permissions.
- Authorized users can also **upload documents or add notes** under existing files.

4. Search and Filter Options

The File Manager includes a robust **Search** functionality to help users quickly locate required files.

- **Search:** Users can search files by title.
- **Filter:** Users can filter files by file type.

This ensures that users can efficiently locate specific files without manually navigating through folders.

5. Access Control and Permissions

- Access to folders and files is controlled through **role-based permissions**.
- Only authorized users can create, modify, or delete files within their designated departments.
- Read-only access may be granted to users outside a department to ensure transparency while maintaining data security.

File Detail

Overview

The File Detail tab in the NASENI ERP system provides users with detailed insights and actionable options for managing individual files within the File Manager module. It enables users to view the complete content of a file, add new pages, provide comments with digital signatures, and collaborate efficiently through an integrated comment and forwarding mechanism.

This feature promotes transparency, document traceability, and seamless inter-departmental communication by allowing users to interact directly within the file workflow.

Functional Description

1. File Overview

- The File Detail tab displays all relevant information and documents associated with a selected file.
- Users can view the file name, file type (General, Contract, Memo, other or Mail), department, reference number, and version details.
- The system ensures that all updates, comments, and actions taken on the file are captured for audit and tracking purposes.

2. Add New Page

- The “Add New Page” feature allows users to insert an additional page into the existing file.
- When a user adds a new page:
 - A page is appended to the file.
 - The newly added page becomes a part of the main document structure and is visible to all authorized users.

Permission - Add New Page

3. Add Comment with Signature

The “Add Comment” feature allows users to provide remarks, approvals, or suggestions directly within the file. Additionally, users can digitally sign their comments to authenticate and validate their input.

Permission - Add File Comment

4. Comment and Forward

The “Comment and Forward” functionality enables users to not only comment on a file but also **forward** it to another user or department for review, approval, or further action. According to the specific permission, comments can be replied and edited too.

Permission - Add File Comment and Forward To

COMMENT SECTION -

SIGNATURE WITH COMMENT-

5. Update Page Number

The **Update Page Number** feature allows users to swap or rearrange the numbering of pages within a file. This function ensures that all pages are properly sequenced, especially after inserting or deleting pages during document editing.

Permission - Update Page Number

6. Delete Page

The **Delete Page** functionality allows users to remove unwanted or incorrect pages from a file. However, to maintain data integrity and prevent accidental deletion of entire files, the system applies a restriction when handling single-page documents.

Permission - Delete Page

7. Print File

The **Print File** feature enables users to select specific pages within a file and generate a consolidated **PDF document** for printing or record purposes. It ensures controlled access, proper validation, and automated delivery of the generated file to the user's registered email address.

Permission - Print File

8. Add Page Note

- Users can create a **note** associated with a specific file page.
- Each note can include a brief message (up to **200 characters**) and can optionally tag another **user** for visibility or follow-up.
- The note is stored as part of the file details and can be later viewed, updated, deleted, or used during forwarding and commenting actions.
- When the user reopens an existing note (after it has been created), the system provides extended options to manage or act upon the note.
- This includes integration with comments, forwarding, updating, deleting, and digital signature capabilities.
- This includes integration with comments, forwarding, updating, deleting, and digital signature capabilities.

Permission - Add/Edit/Delete Sticky Note

Available Options on Reopening a Note:

1. **Add to Comment** – The note can be added to the file's comment thread, allowing the user to include the note as part of the discussion or review.
2. **Comment and Forward** – The note can be combined with the comment and forwarded to another department or user for review or approval.
3. **Update** – Users can modify the note text or tagged user.
4. **Signature** – Users can digitally sign the note to validate their input or confirmation.
5. **Delete** – The note can be permanently deleted by authorized users.

[illegible][illegible]

9. Mark as KIV

- The **Mark as KIV (Keep In View)** feature allows users to temporarily flag or hold a file for later review, without forwarding or assigning it to another user.
- This helps users manage files that require attention or follow-up at a future date.
- The file can be viewed in the My Desk section, under the KIV tab.

10. Forward To

- The **Forward To** feature enables users to send a file to another **user** or **ERP member** for further action, review, or approval.
- Once forwarded, the recipient gains **full access** to the file, including all its pages, notes, comments, and attachments.

Permission - Forward To and Forward to MD/EVC

11. Invite

- The **Invite** feature allows users to share a file with another individual (internal or external ERP user) for **viewing purposes only**.
- Unlike forwarding, invited users have **limited access**.

Permission - Invite/Remove User

12. Payment Request

- The **Payment Request** feature allows users with the required permissions to **initiate, view, or manage** payment requests associated with a specific file.
- It serves as a bridge between the document workflow and the financial processing module within the ERP.
- **Print Payment History** - On clicking this, the user will receive the payment file on their mail and can print the payment history.

Permission - Overhead Payment Info and Capital Payment Info

The screenshot shows a 'Raise Payment Request' dialog box overlaid on a blurred background of an ERP interface. The dialog box contains the following fields and sections:

- Title:** A text input field with the placeholder 'Enter title'.
- Payment purpose:** A text input field with the placeholder 'Enter purpose of payment'.
- Account:** A dropdown menu with 'Select Account' as the placeholder.
- Payment type:** A dropdown menu with 'Select type' as the placeholder.
- Payment to:** A dropdown menu with 'Select vendor' as the placeholder.
- Payment by:** A dropdown menu with 'Select bank account' as the placeholder.
- Transfer:** A dropdown menu with 'Select position' as the placeholder.
- IFS:** A dropdown menu with 'Select IFS' as the placeholder.
- Rate(R):** A text input field with the placeholder 'Enter rate'.
- Amount(A):** A text input field with the placeholder 'Enter amount'.
- Total A/R:** A text input field with the placeholder 'Enter total A/R'.
- Buttons:** A blue 'Submit' button and a blue 'Cancel' button.

13. Timeline

- The **Timeline** provides a detailed chronological view of all **payment-related activities and transaction logs** associated with a particular file.
- It ensures transparency and accountability by displaying each step in the payment workflow.

14. File Logs

- The File Logs section provides a **comprehensive audit trail** of all actions taken on a specific file throughout its lifecycle.
- It is a system-generated log designed for transparency, accountability, and compliance purposes.

15. Latest Note

The **Latest Note** feature enables users to **instantly navigate** to the most recent note added within a file. This eliminates the need for manual searching through multiple pages or entries, improving workflow efficiency.

16. Latest Comment

The **Latest Comment** feature provides users with quick access to the most recent comment added within the file.

It enhances document review efficiency by automatically redirecting users to the page containing the latest feedback or discussion entry.

Module: Memo

This module supports memo creation through uploading a file, requiring essential metadata such as a Document Type, Title and Tag to maintain document structure and traceability.

Permission - Upload Memo

The **Memo Detail Page** allows users to:

- Add new pages to an existing memo.
- Create a new memo directly from the current memo view.
- Use a rich text editor to draft or edit memo content, and
- Maintain memo metadata such as recipients, subject, and routing hierarchy.

This functionality enhances workflow continuity by minimizing navigation and centralizing memo creation and editing processes.

Add New Page

The **Add New Page** feature allows users to append additional pages to an existing memo for further input, clarification, or follow-up communication.

Create New Memo (within Add New Page)

When the user clicks **Create New Memo**, the system opens a **Memo Editor Page** where the user can draft a new memo directly.

This editor provides structured input fields and a built-in text editor for drafting the memo content.

Permission - Create Memo Page

The screenshot shows a web form titled "Create New Memo". At the top, there is a blue button labeled "Create New Memo". Below this, the form is divided into several sections:

- Add New Page**: A section header.
- Select Page Number**: A text input field with a placeholder "Select Page Number" and a dropdown arrow on the right.
- Add tags**: A section header with a small information icon.
- Add a tag**: A text input field.
- Upload File (max 50 MB)**: A section header.
- Choose file**: A button to select a file.
- No file chosen**: A text label.

At the bottom right of the form, there are two buttons: "Add Page" (blue) and "Cancel" (white with a grey border).

CREATE MEMO DOCUMENT - Permission - Upload Memo

Memo Creation and Visibility

- When a memo is created, it automatically appears in the **Memo Approval** tab.
- The **Memo Approval** tab displays a list of all memos created by the logged-in user or those that require the user's action (based on permission level).

Approval Process

- A user with **approval permissions** can review a memo and take one of the following actions:
 1. **Approve:**
 - Once approved, the memo becomes part of the main file and is automatically **attached to the respective page** in the file.
 - The status of the memo updates to **"Approved"**.
 - The creator and other relevant users receive a notification of the approval.
 2. **Reject:**
 - If the approver finds issues or discrepancies in the memo, they can reject it.
 - The status changes to **"Rejected"**.
 3. **Update:**
 - Can view the details and update the memo.
 4. **Query**
 - Can add a query note.
 - The status changes to **"Query"**.
 - The user who creates the memo can resolve the query.

- "Through" person and "Created" person can resolve the query

- Users without approval permissions can only **view** their created memos and monitor the status but **cannot take action** on them

Module: My Desk

The My Desk module provides a centralized workspace where users can track all actions related to their files, including files sent, received, invitations, latest comments, notes, and overall file activity with date details.

Users can view files under tabs such as **All Files**, **Sent Files**, **Received Files**, **Only Invited**, **KIV**, and **Endorsement**, and apply filters like **Date Wise**, **Latest Update**, **File Type**, and **Date Range** to quickly find specific files.

Permission - View File Details

The screenshot displays the NASENI My Desk interface. On the left is a dark sidebar with the NASENI logo and a list of navigation items: Home, My Desk, Documents, Recent, My Files, Comments, Files, My Profile, My Activity, My Requests, My KIV, My Endorsement, My Notes, My Tasks, and My Settings. The main content area has a header with the text "My Desk" and a red arrow pointing to it. Below the header are five summary cards: Pending (0), Under Review (1), Ongoing Document (0), Approved (0), and Requested (0). Below these cards are two filter sections: "Filter By" with a dropdown menu and "Search By" with a dropdown menu. At the bottom is a table with columns: File, Last Updated, Last Date, Last Comment, My Review, Status, Location, and Action. The table contains two rows of data.

File	Last Updated	Last Date	Last Comment	My Review	Status	Location	Action
File 1	2023-10-10 10:10:10	10	10/10/2023	10/10/2023	1	10	10/10/2023
File 2	2023-10-10 10:10:10	10	10/10/2023	10/10/2023	1	10	10/10/2023

Module: Internal Circular

Overview

The **internal circular** module serves as a quick information broadcast feature within the NASENI ERP system.

It allows authorized users to create and display important announcements or updates (referred to as *headlines*) to all users immediately upon login.

This ensures that key organizational updates, circulars, or urgent notifications are effectively communicated across departments through the ERP dashboard.

- Upon successful login to the **NASENI ERP system**, an **internal circular modal window** automatically appears if there are any active news items available.

- The modal displays the **headline(s)** created by authorized users, ensuring immediate visibility to all system users.
- Users must close the modal or acknowledge the message before proceeding further within the ERP.

- Users with the "Internal Circular" permission can generate new announcements.
- To create an internal circular, the user provides:
 - Title
 - Select Portal (dropdown) - ERP NASENI Portal, Contract Portal, Proposal Portal
 - Select Alert Type - Info, Alert, Warning, Success
 - Start Date - Will start from the present date
 - End Date
 - Message

Published Circular

Permission -

Adding Members to the Group

- After the group is created, the user can **add members** to the group.
- The system displays a **list of users** from the ERP user list.
- Multiple members can be added to a single group.
- Each added member can be assigned a specific **role** within the group.
- Each member in a group must have an assigned **role** that defines their permissions within the endorsement workflow.
- Roles may include (as per organization structure):
 - Chairman

- Secretary
- Member
- Other

Create Endorsements

- Users can initiate a new endorsement by selecting the "Create Endorsement" option.

- Upon selection, a **form interface** appears containing required fields for entering endorsement details.
- The user fills in the necessary information and submits the form to create the endorsement record.

Permission - Create Endorsement

The screenshot shows the NASENI application interface. On the left, a dark sidebar contains a menu with 'Endorsement' highlighted by a red rectangle. The main content area is titled 'Create Endorsement'. It features four input fields: 'Title' (with a value of '123'), 'Select Endorsement Type' (with a dropdown value of 'Select Endorsement Type'), 'Select Group' (with a dropdown value of 'Select Group'), and 'Add Tags' (with a value of '1234567'). Below these fields is a large, dark text editor for 'File Content'. At the bottom right, there is a 'Create Endorsement' button.

Fields in the Create Endorsement Form

Field Name	Description	Type	Mandatory
Title	Title or subject of the endorsement	Text	Yes
Select Endorsement Type	Category or nature of endorsement	Dropdown	Yes
Select Group	Group associated with this endorsement	Dropdown	Yes
Add Tags	Keywords for quick identification or filtering	Multi-select	Yes
File Content	Can type or add details	Text Editor	Yes

Adding Multiple Endorsements

- The system allows users to **add multiple endorsements** in one session.
- An **"Add More Endorsement"** button is available on the screen.
- By clicking this button, a **new endorsement form** appears where the user can input additional endorsement details.
- There is **no predefined limit** to the number of endorsements that can be added in one go (subject to permission and system capacity).

The screenshot shows a web form titled "Create Endorsement". At the top, there are four input fields: "Title" (containing "New York City"), "Select Endorsement Type" (containing "Sign"), "Select Group" (containing "path-group"), and "Add Image" (with a green "Add Image" button). Below these is a "File Upload" section with a toolbar containing icons for undo, redo, bold, italic, link, unlink, and a text area. The text area contains the word "Hello". At the bottom right of the text area are two green circular icons. At the bottom of the form are two buttons: "Add More Endorsements" (outlined) and "Create Endorsement" (solid blue).

Endorsement signing-

Assigned group members can sign the endorsement.
Permission - Sign Endorsement

Bulk signing features

The **Bulk Signing** functionality is designed to:

- Simplify and expedite the signing process for multiple endorsements.
- Ensure only authorized personnel can perform bulk signing through permission validation.
- Centralize access under the **"My Desk"** section for ease of use under the **"Endorsement Tab"**
- Maintain a secure and auditable record of all endorsement signing activities.
- It's needed to select at least one checkbox to bulk signing.
- A confirmation pop up will appear and the files will be processed one by one and the status will get updated, can be viewed under the file.

Module:Merge Files

The Merge File module allows users to combine two files—a Parent File and a Child File—into a single file.

During the merge process:

- All comments, invites, and notes from both files are combined into the new merged file.
- The Child File is automatically removed from the portal after merging.

This feature ensures seamless consolidation of related files while preserving all associated actions and history.

Permission -Merge Files

Module: Contractor's Portal and Contract Management

Contractor's Portal (<https://contractor.naseni.xyz/login>)

Overview

The Contractor's Module establishes a seamless connection between the NASENI ERP system and the Contractor Portal, enabling external companies (contractors) to securely access and manage their assigned contracts.

A contract file is created and maintained within the ERP system by authorized personnel. Once a contract is assigned to a specific company, the system automatically sends the contractor an email notification containing the contract details and secure login credentials to access the Contractor Portal.

Upon logging into the Contractor Portal, the contractor can view and manage the contract(s) assigned to their company, ensuring transparency, accountability, and streamlined communication between NASENI and its contractors.

Permission

The screenshot shows the NASENI login interface. At the top is the NASENI logo. Below it is the heading "Log in" followed by the text "Welcome back! Please enter your details." There are two input fields: "Email" with the value "test@naseni.com" and "Password" which is masked with dots. A "Forgot password" link is located below the password field. A blue "Sign in" button is positioned below the links. At the bottom, there is a link that says "Don't have an account? Sign up".

Forget Password

An OTP will be sent to the mail to reset the password.

This block contains two side-by-side screenshots of the NASENI password reset process. The left screenshot is the "Forget password" page, which includes the NASENI logo, the heading "Forget password", the text "Reset your password now!", an "Email" input field containing "Enter your email", a blue "Reset" button, and a "Go back to Login" link. The right screenshot is the "Set new password" page, which includes the NASENI logo, the heading "Set new password", the text "Enter a new secure and strong password", an "OTP" input field containing "Enter OTP", "Password" and "Confirm Password" input fields both containing "Enter password", a blue "Set password" button, and a "Go back to login" link.

As soon as the user logs in to the Contractor's Portal a welcome screen appears.

Settings Tab

Can change the password and view the details.

[illegible]

Overview Tab

Can view the number of contracts assigned.

Bank Accounts

The Bank Accounts feature under the Contractor's Module allows contractors to add and manage their official bank account details within the Contractor Portal. These bank details are mandatory for initiating and processing Payment Requests against assigned contracts.

Add Bank

- The contractor clicks **"Add Bank"** on the side modal.
- A form appears where the contractor enters the below-listed details.
 - Account Number
 - Account Name
 - Bank Name - Here contractors can add the bank manually as well as can select from the drop down menu.

Add Bank ✕

Save

Contracts Tab

The Contracts tab under the Contractor's Module provides contractors with a centralized view of all contracts assigned to their company through the NASENI ERP system. Each assigned contract can be viewed in detail, along with related Payment Requests and Checklists that ensure compliance and progress tracking.

The information in this section is read-only and automatically fetched from the ERP system based on the contract assigned to the contractor.

- **Payment Type** - There are 3 payment types available -
 - **MOBILIZATION (30%)** -
 - Can only create this type of payment only once.
 - Insurance Bond Name and File is required.
 - **MILESTONE (1 - 100%)** - Can create multiple payments as per amount.
 - Users can enter the amount percentage.
 - **FULL (100%)** - Can only be done once in the whole contract.
 - Attaching a job completion certificate is required.

Payment Request Detail Page

The Payment Request Detail Page within the Contractor's Module provides contractors with comprehensive visibility into each payment request linked to a specific contract. This page allows contractors to review all relevant payment details, including payment amount, type, request status, and associated workflow actions, ensuring full transparency in the payment lifecycle. Displays the current processing stage of the payment request.

Contract Management(Under Admin)

Within the ERP Portal, the **Contract Management Module** is organized into multiple **sub-tabs**, each serving a specific purpose in the contract management process.

Permission -

Under Contracts, you'll find:

- **Dashboard** – Summarizes all contract metrics
- **Contracts** – List and create contracts

- Contractor – Registered vendors
- Checklist – Document requirements
- Compliance Documents

Dashboard -Admin

The Dashboard provides a comprehensive overview of all contracts and related activities.

Contract Creation & Upload

- Go to File Manager → Upload.

- Fill in the document metadata:
 - Document Type: Contract
 - Title
 - File Number
 - File Category
 - File Status
 - Enter Keywords
 - Classification
 - Add Tags
 - Upload Contract File

Compliance Document

The Compliance Document Tab within the Contract Management Module is designed to manage all supporting documents required for contractual compliance between NASNI and its Contractors.

The Compliance Document Tab provides two main functionalities:

1. Create Compliance Document

- During creation, users can:
 - Select relevant compliance documents from the existing repository.
 - Assign a descriptive name or title to the checklist.
 - Add additional notes or remarks (optional).
 - Authorized users can edit an existing checklist.
 - Users can view checklist details.

The 'Create Checklist' form includes the following fields:

- Name:** A text input field with the placeholder 'Enter Name'.
- Select Compliance Document:** A dropdown menu with the placeholder 'Select Compliance Document'.
- Description:** A text area with the placeholder 'Enter description'.

A blue 'Create' button is located at the bottom right of the form.

The dashboard features a dark sidebar with the NASeni logo and a navigation menu. The main content area is titled 'Department Cycle Checklist' and includes a 'View All' button. Below this is a table with the following structure:

Name	Description	Action
Department		Edit Delete

A red arrow points to the 'Action' column header. At the bottom of the table, there is a 'Showing 1 of 1 entries' message and a blue circular icon.

Assign Checklist

The Assign Checklist tab within the Contract Management Module enables NASENI administrators and authorized users to assign pre-defined compliance checklists to specific contractors and contracts.

Once the checklist has been assigned:

- The **NASENI-side checklist (Internal)** will appear under the **NASENI Checklist tab**.
- The **Contractor-side checklist** will appear under the **Contractor Checklist tab**.

Module: USER

This module enables the creation, management, and maintenance of staff records within the ERP system.

It allows authorized users to add new staff members, upload multiple staff records in bulk, view staff details, and edit existing staff information.

This ensures centralized user management and controlled access across the ERP system.

Permission – Add Staff

Permission – Staff Bulk Upload

User Section Permission =

Staff Creation

In the ERP system, staff must be created before they can access the system or be assigned roles and responsibilities.

Once a staff member is created, their record automatically appears in the Staff List.

Staff can be created using two methods:

1. Add Staff (Manual Creation)

The Add Staff feature allows authorized users to create individual staff profiles by entering required details through a form.

After successful creation:

- The staff record is saved in the system.
- The newly created staff member appears in the Staff List.
- The staff profile becomes available for viewing and editing.

Permission – Add Staff

2. Bulk Upload Staff

The Bulk Upload feature allows authorized users to create multiple staff accounts at once by uploading a predefined file format.

This feature helps save time and ensures efficient onboarding of large numbers of staff members.

After successful upload:

- Multiple staff records are created simultaneously.
- All newly created staff members appear in the Staff List.

Permission – Bulk Upload Staff

Staff List

The Staff List displays all staff members created in the system.

Authorized users can perform the following actions:

- View staff details
- Edit staff information

This ensures that staff data remains accurate and up to date.

Staff Details

Users with the appropriate permissions can open a staff profile to view complete staff information.

They can also update or edit staff details whenever required to maintain accurate records.

Permission – Edit Staff (for Edit Access)

Update Staff Position

The ERP system allows authorized users to update the position of an existing staff member. This ensures that staff roles remain aligned with organizational changes and responsibilities.

Users can update the position by clicking the **Update Position** button available in the staff profile or staff list.

After updating:

- The new position is saved immediately.
- The updated role reflects across the system wherever the staff member is assigned.
- This helps maintain accurate hierarchy and workflow routing.

Permission – Add Staff (Edit Access Required)

Available Staff Positions

The system supports the following predefined staff positions:

- Director Assistant
- Unit Head
- EVC Assistant
- Director & Directorate

This feature ensures proper role management and supports accurate workflow and approval routing within the ERP system.

The screenshot displays the NASENI system interface. On the left is a dark sidebar with navigation links. The main area shows a table of staff positions. The 'Position' column is highlighted with a red box, indicating the roles assigned to staff members.

Employee ID	Role	Position	Department	Position	Status	Notes
100001	Director Assistant	Director Assistant	Director's Office	Director Assistant	Active	
100002	Unit Head	Unit Head	Director's Office	Unit Head	Active	
100003	Director Assistant	Director Assistant	Director's Office	Director Assistant	Active	
100004	Unit Head	Unit Head	Director's Office	Unit Head	Active	
100005	Director Assistant	Director Assistant	Director's Office	Director Assistant	Active	
100006	Unit Head	Unit Head	Director's Office	Unit Head	Active	

Permission – Update Role To EVC Assistant , Update Role To Assistant , Update Role To Unit Head , Update Role To Director , Update Role To Staff

Staff Account Permissions & Actions

The ERP system allows authorized users to manage staff account access and security. These controls ensure proper user lifecycle management and system security.

Authorized users can perform the following actions on staff accounts:

Change Password

Authorized users can reset or change the password of a staff member when required.

This is useful when:

- A user forgets their password
- A security reset is required
- A new password needs to be issued by the administrator

After updating, the staff member can log in using the new password.

Permission – Reset Other Password

Suspend / Revoke Access

The system allows administrators to suspend or revoke a staff member's access to the ERP system.

This action is typically used when:

- A staff member is on leave or inactive
- Temporary access needs to be removed
- Security or compliance action is required

After suspension:

- The staff member will no longer be able to log in.
- Their data remains safe / preserved in the system for future use or reactivation.

Permission – Suspend/Revoke Staff

Delete Staff

Authorized users can permanently delete a staff member from the system when the account is no longer required.

This action should be used carefully as it removes the staff record from the system.

This functionality ensures proper staff lifecycle and secure access management within the ERP system.

Permission – Delete Staff

Module:Office

The Office module in the NASENI ERP system provides functionality for managing office-level users associated with an office. It allows users to view the office details and members assigned to the office, search for users, and add users to the office through the Office Details screen.

The Office Details screen provides an overview of a selected office and displays the users or members associated with that office.

2. Add Office User

The Add Office User functionality allows an authorized user to assign an existing system user to the selected office.

Open the Office Details page for the required office.

Click the 'Add Office User' button.

The 'Assign Office User' side panel opens.

Use the 'Search & Select User' field to search for an existing user.

Select the required user from the displayed user list.

The selected user can then be assigned to the office.

Column Name	Description
Name	Displays the name of the office user/member.
Employee Number	Displays the unique employee number of the user.
Email	Displays the user's email address.
Department	Displays the department associated with the user.
Designation	Displays the user's designation.
Position	Displays the user's position within the organization.
Action	Provides available actions that can be performed for the user.

3. Assign Office User

The Assign Office User side panel provides a searchable list of existing users. The user list displays the person's name along with their email address, allowing the administrator to identify and select the required user.

The assignment interface contains:

Search & Select User field

Searchable user list, User name, User email address

Selection control for assigning the user

Example user entries shown in the interface are displayed in the format 'Name (email address)'.

4. User Creation / Staff Information

The staff creation interface contains multiple sections for capturing and maintaining staff information.

Field Name	Description
Home Town	Staff member's home town.
LGA	Local Government Area associated with the staff member.

Pin Number	PIN number of the staff member.
Phone Number	Staff member's contact number.
Address of Staff	Residential/address details of the staff member.
Emergency Contact	Contact number/details for emergency purposes.
Official Email	Official email address of the staff member.
GEO Political Zone	Geopolitical zone associated with the staff member.

The Office user assignment flow can be summarized as follows:

Navigate to the Office section.

Open the required office from the office list.

View the Office Details page.

Click 'Add Office User'.

Search for the required existing user.

Select the user from the search results.

Assign the selected user to the office.

The assigned user is expected to appear in the Office Details user/member list.

Module: Directorate Management

This module allows authorized users to manage the organizational structure within the ERP system by creating and maintaining Directorates, Departments, and Units.

It ensures proper hierarchy setup, role assignment, and structured workflow routing across the system.

Permission – View Directorates

Organizational Structure Creation

Based on user permissions, authorized users can create:

- Directorate
- Department
- Unit

These entities help define the organizational hierarchy and are used for assigning staff, routing files, and managing workflows.

Users can perform the following actions:

- Add new Directorate, Department, or Unit
- Edit existing records
- Delete records when no dependencies exist

Add Directorate / Department / Unit

Authorized users can create new organizational entities by providing the required details.

After creation:

- The new entity becomes available for staff assignment and workflow routing.
- It appears in the respective list within the system.

Permission – Add/Edit Directorate , Add/Edit Department, Add/Edit Unit

Edit Directorate / Department / Unit

Users with appropriate permissions can update existing Directorate, Department, or Unit details whenever organizational changes occur.

This ensures that the ERP structure remains aligned with the current organization hierarchy.

Delete Directorate / Department / Unit

The system allows deletion of Directorate, Department, or Unit only when no dependencies exist.

Deletion is allowed only if:

- No staff member is assigned to the entity
- No file or record belongs to the entity

This restriction prevents data loss and maintains system integrity.

Permission – Delete Directorate , Delete Department ,Delete Unit

The screenshot displays the NASENI system interface. On the left is a dark sidebar with the NASENI logo and a list of navigation items. The main content area shows a table with columns: Name, Description, Last Updated Date, and Actions. A red arrow points to the 'Delete' button in the Actions column for the first row. Below the table, there is a 'Showing 4 of 4 entries' indicator. At the bottom left, the date '2024/12/11' is visible.

Name	Description	Last Updated Date	Actions
Directorate / Department / Unit		2024/12/11	View Edit Delete
Directorate / Department / Unit		2024/12/11	View Edit Delete

Module: Leave Management

The Leave Management module provides functionality for viewing leave information, monitoring leave requests, applying for leave, and reviewing leave requests.

Leave Management Navigation

Menu Item	Description
Dashboard	Provides leave summary, status overview, leave type overview and leave request information.
My Leave Records	Displays leave records and provides search, filtering and leave request functionality.
Leave Approvals	Displays leave requests for review and approvals
Holiday Calendar	Displays the Annual Leaves
Leave Type	Casual Leave, Earned Leave, Sick Leave, Maternity Leave, Paternity Leave, Unpaid Leave, Study Leave, Annual Leave
Leave Assign	

Module: Form Builder

The Form Builder module enables staff and authorized users to create customizable digital forms, assign them to other users, and manage the complete form submission and approval workflow.

This module helps digitize data collection, streamline approvals, and provide real-time tracking through dashboard analytics.

Permission – view Form Dashboard

Permission –View Form Builder

Form Creation

Authorized staff and users can create dynamic forms using the Form Builder.

During form creation, users can:

- Define form title and description
- Add required fields and inputs
- Save the form as Draft or Publish it
- Assign the form to selected users

Once published, the form becomes available to assigned users for submission.

Permission – Create / Edit Form Builder

The screenshot shows the NASENI form builder interface. On the left is a dark sidebar with the NASENI logo and a list of navigation items: Home, Form, Form Builder, Form Library, Form Settings, Form Design, Form Preview, Form Test, Form Publish, Form Analytics, Form History, Form Settings, Form Design, Form Preview, Form Test, Form Publish, Form Analytics, Form History. The main area is light gray and contains a form titled 'Form 1'. The form has three input fields: 'Name (Full)', 'Email', and 'Phone'. Below these fields is a 'Form Description' section with a placeholder text 'Please enter a description here'. To the right of the form description are two buttons: 'Save Form' (blue) and 'Cancel' (orange). Below the form description is a 'Field Types' section with a list of field types: Text (Input), Number (Input), Date (Input), etc. To the right of the field types is a 'Steps' section with a list of steps: Step 1, Step 2, etc. The form is currently in 'Step 1' and shows a 'New Section' button and a 'Submit' button.

Form Assignment

After creating a form, the creator can assign it to specific users who are required to fill and submit the form.

Assigned users will:

- Receive access to the form
- Fill the required information
- Submit the form for review or approval

This ensures structured data collection and accountability.

Form Submission by Users

Other users assigned to the form can:

- Open the assigned form
- Fill in the required details
- Submit the form for approval

Once submitted, the form moves into the review/approval workflow.

Form Workflow Actions

Authorized users can review submitted forms and take the following actions:

Approve

- The form status changes to Approved
- The submission is finalized and recorded

Reject

- The form status changes to Rejected.
- The submitter may be required to make corrections.

Review

- The reviewer can examine the submission and provide feedback before final approval.

Permission – Approve / Reject Form , View Review / Approvals

Draft Forms

While creating a form, users can save it as Draft.

Draft forms are not visible to other users until they are published

Form Dashboard

The dashboard provides real-time statistics to help track form activity across the system.

Users can view counts of:

- Total Forms
- Submitted Forms
- Pending Forms
- Approved Forms
- Draft Forms

This provides quick insights into form usage and workflow status.

Permission – view Form Dashboard

Capital Payment Flow

EVC Review Process

- The EVC receives the newly created payment request under their review tab under EVC.
- Upon review, the EVC takes one of the following actions:
 1. **Send to Procurement** – The payment request is forwarded to the Procurement Department for further processing.

-
- The screenshot shows a Microsoft Teams chat window. At the top, there's a header bar with the document name "Test Document (1)" and a list of participants: "John Doe", "Jane Smith", "Bob Johnson", "Alice Brown", "Charlie White", and "David Black". Below the header, the chat area displays a message from "John Doe" that says "no comments yet". The right sidebar shows a list of documents and a search bar.

Procurement Department Handling

Once the payment request reaches the Procurement stage,

1. The Head of Procurement reviews the received payment request.
2. The Head of Procurement **appoints a Procurement Officer** to process or "treat" the payment request further.
3. The appointment is executed through the note
 - o The Head of Procurement adds a **comment** (providing instructions or context).
 - o Applies their **signature**.
 - o Selects and **forwards the payment** to the appointed Procurement Officer.
4. The payment request is now visible under the **assigned Procurement Officer's** under **Proc Officer**, where they can take further actions (e.g., review, raise queries, or approve/reject based on findings).
5. the payment status automatically updates from: **EVC Reviewed — D Proc Reviewed**

Raise Memo (Procurement Appoint Officer)

- The Procurement Officer, upon reviewing a payment request, may identify a need for compliance validation.
- In such cases, the officer can use the “Raise Memo” functionality available in their workflow dashboard.

Assigned to Procurement Officer → Memo Raised (Pending Compliance Review)

2. **Approve** the memo if it meets all procurement and compliance requirements.
 3. **Reject or return for correction** if any clarification or document update is required.
- Upon **approval**, the system automatically routes the memo back to the **Head of Procurement** for final approval.
 - The payment status changes from: **Memo Raised (Pending Compliance Review) → Compliance Approved (Pending Head of Procurement Approval)**

The image displays two screenshots of the NASENI system interface, specifically the 'Department Procurement' section.

Top Screenshot: The interface shows a 'No comments yet' area. A red arrow points to the 'Approve' button in the bottom right corner of the main content area.

Bottom Screenshot: The interface shows the 'Approve Compliance' modal. The modal includes a 'Signature' field with a handwritten signature, a 'Submit' button, and a 'Cancel' button.

Final Approval (Head of Procurement)

- This signifies that the memo has been fully validated and approved within the procurement hierarchy.

Checking Officer

This is the head role (checking.accounts@yopmail.com) Internal Checking Officer verifies payment as "Checked" with stamp and sends to Auditor/D Audit

Status - Account Review to Checked

The image displays two screenshots of the NASENI system interface, illustrating the workflow for a Checking Officer.

Top Screenshot: Account Review

- The interface shows a sidebar with navigation options: Home, Accounts, Payments, Transactions, Audit, and Settings.
- The main area displays a list of accounts under the heading "Account Review".
- A red arrow points to the "Check" button at the bottom right of the account list.
- The "Check" button is highlighted in green.

Bottom Screenshot: Send to Audit

- The interface shows the "Send to Audit" screen.
- The main area displays a list of accounts under the heading "Send to Audit".
- A red arrow points to the "Send to Audit" button at the bottom right of the account list.
- The "Send to Audit" button is highlighted in blue.

The screenshot displays a web application interface with a dark sidebar on the left containing navigation links. The main area shows a table with the following columns: Approved Amount Name, Approved Role, Amount (K), Role Amount (K), Approved Name, Approved Email, Date, and Approved Amount. The table contains several rows of data, including entries for 'Director Audit' and 'Director Audit Officer'.

Approved Amount Name	Approved Role	Amount (K)	Role Amount (K)	Approved Name	Approved Email	Date	Approved Amount
Director Audit	Director Audit	100.00	100.00	Director Audit	director.audit@vopmail.com	2023-03-01	100.00
Director Audit Officer	Director Audit Officer	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
Director Audit Officer	Director Audit Officer	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00

Director Audit Officer	Director Audit Officer	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
Director Audit Officer	Director Audit Officer	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00

Auditor

- Director Audit appoints Audit Officer to review payment information, payment ledger and all documents
- Head Role - Director Audit (eg, director.audit@vopmail.com)
- The auditor can appoint the audit officer or direct to send "final audit" and can also view the preview voucher and can create the raise query too.

The screenshot shows the 'Department Audit' interface in the NASeni system. The interface includes a sidebar with navigation links and a main area with a 'Preview Voucher' section. A red arrow points to the 'Preview Voucher' button. The 'Preview Voucher' section displays a table with the following columns: Sequence Number, Amount (K), Role Amount (K), Approved Name, Approved Email, Date, and Approved Amount. The table contains several rows of data, including entries for 'Director Audit' and 'Director Audit Officer'.

Sequence Number	Amount (K)	Role Amount (K)	Approved Name	Approved Email	Date	Approved Amount
1	100.00	100.00	Director Audit	director.audit@vopmail.com	2023-03-01	100.00
2	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
3	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
4	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
5	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
6	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
7	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00

9	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00
10	100.00	100.00	Director Audit Officer	director.audit.officer@vopmail.com	2023-03-01	100.00

Status - Checked to Auditor Reviewed

Audit Officer

- The Audit Officer reviews payment information, payment ledger and all documents and sends them back to the Director.
- Audit for final signoff and "Audited" stamp.

Status - Auditor Reviewed to Auditor Approved

The screenshot displays the NASENI system interface, showing the audit process. The top section displays a table of departmental audits, and the bottom section shows a detailed view of a specific audit.

Departmental Audits Table:

Department Name	Amount	Status	Date
...	...	...	...

Audit Details View:

The detailed view shows a list of items being audited, a comment section, and a summary table of financial data.

Summary Table:

Item	Amount
...	...
Total	...

The "Total" row in the summary table is highlighted with a red box.

Auditor Approval

Director Audit marks payment as Audited and sends back to DFA for final processing
 Note: Director Audit or Auditing officer can print entire payment history with approvals, signatures, vouchers, memos etc.

Status - Audit Review to Auditor Approved

DFA

DFA Appoints an Account officer of choice to disburse the payment. This is the head role.

Status - Auditor Approve to Payment Processing

Final Payment - Status - Audit Payment Processing to PAID

Module: File Approval

The File Approval module allows users to request access to files that belong to another Directorate, Department, or Unit.

This ensures secure file sharing while maintaining controlled access and proper authorization.

Permission – Request File Access

File Access Request

If a user needs to view a file that belongs to another Directorate, Department, or Unit, they can submit a File Access Request.

This feature helps maintain confidentiality while allowing cross-department collaboration when required.

After submitting the request:

- The request is sent to the file owner.
- The request appears in the owner's File Approval Tab.

Permission – Request File Access

File Approval Tab (Owner Side)

The File Approval tab allows file owners to manage incoming file access requests.

The file owner can review:

- Who requested access
- Which file access is requested
- Request details

Approval Actions

The file owner can take the following actions:

Approve

- The requester gets permission to view the file.
- The file becomes accessible to the requesting user.
- Access is granted securely without transferring ownership.

Reject

- The requester is denied access to the file.
- The file remains restricted to the original department/unit/directorate.

Permission – Approve File Access

Module: Proposal

Overview

- The **Proposal module** within the **NASENI ERP System** is designed to facilitate the submission and management of business proposals from registered companies.
- This module allows external companies or vendors to formally register, log in, and submit proposals for review and consideration by NASENI.
- The functionality ensures a structured and transparent process for proposal management - from registration to submission and subsequent review.

The image displays two screenshots of the NASENI ERP System interface. The left screenshot shows the 'Create account' form, which includes fields for First Name, Last Name, Email, Phone, Password, Confirm Password, and Company Name. The right screenshot shows the 'Log in' form, which includes fields for Email and Password, a 'Sign in' button, and a link for 'Don't have an account? Sign up'.

Company Registration

Before creating a proposal, a company must first **register** on the NASENI Proposal Portal:

<https://proposal.naseni.xyz/register>

Registration Process:

- The user accesses the **registration link** and provides mandatory company details such as:
 - First Name
 - Last Name
 - Email Address
 - Password
 - Confirm Password
 - Company Name
- Upon successful registration, the system sends a **confirmation email** to verify the user's account.
- Once verified, the company can log in to the **Proposal Portal** using its registered credentials.

Login and Access

- After registration, users can log in via the **Proposal Portal**.
- The system validates credentials and redirects the user to the **Proposal Overview Screen**, where they can initiate and manage proposal-related activities.

- Only authenticated users can access the **Create Proposal** feature.

Proposal Creation

Once logged in, the registered company can proceed to create a proposal.

The screenshot shows the NASENI portal interface. On the left is a dark sidebar with the NASENI logo and navigation links: Home, Proposal, and Account settings. The main content area is titled 'Create new proposal' with a subtitle '(Individuals or groups who do not have a company) (R00000)'. Below the title are four input fields: 'Project Description', 'Assessor's E-mail Address', 'Project's A. Regional project location', and 'Technology/Products & Commercial Addition'. A blue 'Save & Proceed' button is located below these fields. The top right corner of the page shows a user profile icon and the text 'Company: N'.

Steps for Creating a Proposal:

1. Navigate to "Create Proposal" under the Proposal module.
2. Open the "Create New Proposal" page on the portal.
3. There are 5 Assessment Steps for Proposal Creation.

General Information

The screenshot shows the NASENI portal interface for the 'Product Development' section. The sidebar on the left is identical to the previous screenshot. The main content area is titled 'Product Development' and features a progress bar with five steps: 'Development', 'On-site Assessment', 'Document Assessment', 'On-site Assessment', and 'Create Proposal'. The first step, 'Development', is currently active. Below the progress bar, there are several input fields and checkboxes. The 'Stakeholders, investors (Individuals, SMEs, Academia etc.)' section includes a 'No Response' checkbox and a 'Full Name of Organization' field. The 'How I assessed' section includes a 'Assessment' field and a 'Registration Number' field. The 'For the creation of the product or service, is required company or a foreign company?' section includes a 'Foreign company' checkbox and a 'Domestic company' checkbox. The top right corner of the page shows a user profile icon and the text 'Company: N'.

Contact person (incl. Title & Position) in the organization principal staff who will manage the project and will be the point of contact with NASER

Previous Create & Submit

My Proposals - All the created and listed proposals appear here.

Under the proposal tab, admin can view all the proposals according to the permissions:

Download All Documents

Allows users to download all files and attachments related to a particular proposal in a single action.

Query

On the **Proposal Page**, users (reviewers or administrators) will find a “**Query**” button.

Clicking this button opens a **pop-up window** where the user can raise a query related to the current proposal.

The company will have an option to resolve the query.

The screenshot shows a 'Query' pop-up window with a title bar containing the word 'Query' and a close button (X). Inside the window, there is a section titled 'Query' with a text input field containing the text 'Please correct the organization | spell'. To the right of the input field are two green circular icons: one with a location pin and another with a speech bubble. At the bottom right of the window is a blue button labeled 'Submit'.

Invite Team -

Accessing the Invite Team Feature

- On the Proposal Page, users can see an option button: "Invite Team."
- This option is accessible only to users who have permission to manage teams.

When the user clicks "Invite Team," the system displays a team list.

Team Creation Process

1. Create Team:

- The user clicks on **"Create Team"** to initiate the process.
- A **team creation form** appears where the user can define the **Team Name** and **Description (optional)**.
- Once saved, the team is created and listed under the user's available teams.

2. Add Team Members:

- After team creation, the user can add members to the team by clicking on the **"Add Team Member"** option.
- The system displays a **list of users** registered within the ERP system.
- The user can **select multiple members** from this list to include in the team.
- Once selected, members are added to the team, and their details

Inviting Team to a Proposal

- Once the team is created and members are added, the user can **invite the team** to a specific proposal.
- Within the **Proposal Page**, there is an option **"Invite Team to Proposal."**
- Clicking this option allows the user to:
 - Select an existing team from the dropdown.
 - Assign that team to the current proposal.
- Once invited, all team members gain access to the proposal as per their permission levels (view/edit/comment).

First Review

1. The reviewer navigates to the Proposal Page.
2. The "First Review" button is displayed within the proposal action panel.
3. When the user clicks the "First Review" button:
 - A dropdown menu appears containing predefined review options (e.g., *Approved for Final Review*, *Needs Revision*, *Rejected for Further Review*, etc.).
4. The reviewer selects one appropriate option from the dropdown list.
5. Once an option is selected, the system:
 - Validates the selection.
 - Updates the proposal's status automatically to "Under Final Review."
 - Records the reviewer's action in the system logs.

Submit

Final Review

EVC can perform this step and can approve/reject the proposal and also add the comment.

Module: Roles & Permissions

The ERP system is completely permission-based, meaning users can perform actions only according to the roles and permissions assigned to them. Each module and feature has separate permissions that must be enabled before a user can access or perform related actions.

The system includes predefined **Head Roles** whose permissions are managed from the backend and cannot be modified. Authorized users can create, edit, and delete custom roles, as well as assign, change, or remove users from roles to ensure proper access control across the system.

Module: System Logs

The System Logs section records all major activities performed within the portal to ensure transparency, monitoring, and security tracking.

The logs display details such as Email, IP Address, User Agent, Created Date/Time, and Message. The message field shows activities like user login, actions performed on files, and new user activation, ensuring all system activities are centrally maintained and traceable.

Module: Change Password

Users are initially provided login credentials by the administrator. After logging in, they can change their password to secure their account.

Once logged in with their updated password, users can access and perform actions based on the permissions assigned to them.

The image shows a 'Change Password' form. It has a light blue header with the title 'Change Password'. Below the header, there are three input fields: 'Current Password' with a placeholder 'Enter old password', 'New Password' with a placeholder 'Enter new password', and 'Confirm New Password' with a placeholder 'Confirm new password'. At the bottom of the form is a blue button labeled 'Change Password'.

Module: Profile

The Profile module allows users to view and update their personal details and access all uploaded documents in one place.

When a user logs in for the first time, they are automatically redirected to the Profile page. This page is available to all users under the Settings tab and does not require any special permission to access.
